Work Experience

WISPOK

Frontend Developer │ January 2024 - Present

As a Frontend Developer at Wispok, I specialize in developing and continuously enhancing key functionalities of our products. My role involves close collaboration with multiple teams including UI/UX designers for prototyping and design consistency, as well as backend teams providing endpoints for seamless integration and functionality.

- API consumption cost optimization and reduction: Implemented effective strategies that optimized our API consumption, reducing operational costs.
- SCSS and CSS content optimization and reduction: Utilized code optimization techniques to streamline and reduce the complexity of our styles, thereby improving loading times and overall performance.
- Creation of a component library: Developed a robust library of reusable components for internal use, ensuring consistency across our products and accelerating development timelines.

FIVERR
Freelance UI Designer/ Developer │ September 2021 - Present

Design of user interfaces for diverse projects, spanning mobile applications, landing pages, and more, across both mobile and desktop technologies.

- Developing designs that work effectively in mobile and desktop environments, ensuring a consistent experience for users across different devices.
- Teamwork with developers, designers and other professionals to ensure consistency of design and functionality across different platforms.
- Successful experience in delivering designs for different types of projects, demonstrating adaptability and versatility in creating user interfaces.
