Summary

Graduated in Computer Engineering from the Universidad de Guadalajara CUCEI, where I acquired skills in programming, databases, working methodologies, etc. Current focus as Front-end Developer, I have experience in UI and UX design.

Passionate about creating attractive and functional interfaces that improve the user experience.

My passion lies in creating applications with attractive and functional designs, my future goal is to work with a company where I can become a senior Front-End developer.

FIVERR
Freelance UI Designer | September 2021 - Present

Design of user interfaces for various projects, based on mobile and desktop technologies such as mobile applications, landing pages, etc.

GONVILL
Counter Assistant | January 2019 - May 2021

For two years and five months I was a counter assistant at Gonvill bookstores where I performed in the following areas:

- Service orientation: skilled at contacting people, ability to listen, empathy, trust and quality in their relationships.
- Commercial orientation: ability to persuade, leadership traits, not afraid of change, persistent and I can work under pressure.
- Emotional intelligence: initiative and attitude, transparent and honest.
- Organizational orientation: I identify opportunities, focused on details, tidy, accurate and always up to date.
